To the Inhabitants of California

The Central Government of Mexico having commenced hostilities against the United States of America, by invading its territory, and attacking the troops of the United States on the North side of the Rio Grande, with a force of seven thousand men under the command of General Arista, which Army was totally destroyed and all their Artillery, baggage &c &c Captured on the 8th and 9th of May last, by a force of two thousand three hundred Men under the command of General Taylor and the City of Matamoras taken and occupied by the forces of the United States. The two Nations being actually at war by the transaction, I shall hoist the Standard of the United States at Monterey immediately, and shall carry it throughout California. I declare to the inhabitants of California that although I come in arms with a powerful force, I do not come among them as an enemy to Californias, but on the contrary, I come as their best friend, as whenever California will be a portion of the United States and its peaceable Inhabitants will enjoy the same rights and privileges as the citizens of any other portion of that nation, with all the rights and privileges they now enjoy, together with the privilege of electing their own Magistrates and other officers for the administration of Justice among themselves, and the same protection will be extended to them as to any other State of the Union. They will also enjoy a permanent Government under which life, property, and the constitutional rights and lawful liberty, the worship of the Creator in a way most congenial to each ones sense of duty are to be secured, which unfortunately the Central Government of Mexico cannot afford them, distroyed as her resources are by internal factions, and corrupt officers, who create

FOREWORD

This collection is, of course, distinguished by its possession of the greatest historical discovery that has been made for more than a generation. But, even omitting the FORT SUTTER PAPERS from consideration, the material here embraced is unusually noteworthy for its rarity and for its value and intrinsic importance as a record of national development.

Several things have contributed to the present keen appreciation and demand for chronicles relating to the Early West and Far West. One of those elements lies in the fact that more human adventure and hardship were mingled with the western movement in America, than with a similar period in the growth of any other nation. Another reason is the realization of the relationship borne by those migrations to the present condition of the world. Still a third reason is to be found in the fact that the Middle West and the Far West of to-day are filled with libraries, universities, historical societies and other institutions, to which such narratives are a necessity in order that they may possess the early records of their own neighborhoods and regions; and a fourth cause of the competition is the fact that such books, pamphlets, maps, and other productions were almost invariably printed in small editions, despite their unusual and permanent interest.

As a result of all these causes the material dealing with the Pioneer West has almost disappeared, and in the very near future is certain to appreciate greatly in value. Opportunities such as are afforded by the dispersal of this collection are, in consequence, recognized as events of importance.

No necessity exists for comment on the FORT SUTTER PAPERS, the discovery and existence of which are of vastly wider consequence than as an item in a sale of rare historical material. Aside from those documents, the collection is rich in valuable and unusual titles, many of which here appear for the first time in the records.

THE FORT SUTTER PAPERS

70. **CALIFORNIA.** The Fort Sutter Papers. In 39 vols., folio.

Sutter's Fort, Sonoma, Yerba Buena, Monterey, and elsewhere, 1846-47

The documents are mounted on the numbered leaves of morocco-bound volumes for purposes of preservation and convenient reference. Each volume has a printed title-page, and a printed historical introduction discussing the relation borne by its contents to the events and personages with which the manuscripts deal. A preliminary volume contains a printed summary and general introduction, a preface, and a descriptive catalogue of the material.

The printing and binding are splendidly done by the De Vinne Press, with a dignity and simplicity in keeping with the importance of the manuscripts. The arrangement, grouping and cataloguing of the documents, and the introductions and critical summary, were done by the historian Seymour Dunbar, who was occupied in the task for a year following the discovery of the papers.

Any attempt to emphasize the extraordinary nature, importance, and historical value of these documents would be needless. A list of them is given below. Among the papers are Castro's Proclamation of March 8, 1846; Hardy's Original Manuscript bill rendered for the transportation of the Sonoma Captives to Sutter's Fort and other Bear Flag services; the Original Manuscript copy of Commodore Sloat's Proclamation of Annexation, which was written on board the "Savannah" in Monterey harbor and sent to the Fort; the Original Manuscript appeal for freedom addressed to Kern by the Sonoma Captives; Kern's correspondence with Montgomery concerning them, and Fremont's instructions to him about them; the letters of Missroon; the Original Manuscript of Revere's "Call all Americans to arms" letter; Edwin Bryant's proposal for raising men to recapture Los Angeles; Montgomery's letters and orders to Kern; Kern's own drafts of replies to Montgomery; Pickett's original letters in denunciation of the administration of Hull and Mervine; Kern's records of garrison affairs; the Fort Sutter muster rolls and pay rolls in the manuscript of Kern and Captain Sutter; the original appeal for help sent to the Fort by the settlers on Bear Creek; William Richardson's assertion of neutrality and plea for the release of his vessel; Kern's report of his campaign against the Indians; Fallon's report from Bear Creek; messages from Fremont (one of which is signed as Military Commandant of the Territory); a collection of hitherto unknown material relating to the rescue of the Donner Party; the letters of McKinstry; of Snyder; of Watmough; of Gillespie; Kern's contract establishing the first postal service in California in behalf of the United States; a document by Semple establishing Fremont's leadership of the Bear Flag activities before his elevation to that position by the Sonoma Convention, and a mass of other documents whose existence has previously been unknown.

In addition, there is also Richard Kern's report to Senator Gwin on overland railway routes, and a remarkable assemblage of papers dealing with the disaster to Fremont's Fourth Expedition (of which both Edward and Richard Kern were members) in the New Mexican Mountains during the winter of 1848; the rupture between Fremont and the Kerns due to that event; Fremont's unjustified attempt to place the blame for the catastrophe on "Old Bill" Williams; the deaths of Williams and Dr. Benjamin Kern; the loss of the Fort Sutter records (including these papers) during the fatal winter retreat from the New Mexican Mountains; and the long search afterward made in an endeavor to recover the manuscripts.

All the manuscripts (except one) despite their strange history and vicissitudes, are in splendid condition. The one exception is water-stained or snow-stained, but still entirely legible. The others show by their freshness and crispness the care with which they were guarded during three transcontinental journeys, and which saved them during the several years in which they were lost in the mountains.

These papers have been the subject of unavailing search for more than half a century. Bancroft, whose exhaustive investigations yielded many other priceless historical treasures of similar character, finally abandoned hope of their discovery, and stated, in his volumes, THAT A VEIL OF MYSTERY SHROUDED THE EVENTS OF 1846 AND 1847 IN THE SACRAMENTO VALLEY, AND THAT VERY LITTLE WAS KNOWN OF AFFAIRS AT SUTTER'S FORT DURING KERN'S ADMINISTRATION AS COMMANDER THERE.

The finding of the manuscripts bears out Bancroft's estimate of their consequence, and, in addition, points to General Kearney's attitude towards Fremont and Kern as the probable cause of their disappearance in 1847. Within about a year after date they were abandoned in the New Mexican Mountains, where they lay for an unknown period, and neither the documents themselves nor Kern's related papers reveal the date when they were discovered and again came into his possession. Certain letters do show, however, that he was still searching for them in 1851. Their history from that date until their recent accidental discovery is unknown.

As now assembled for their permanent preservation the manuscripts have been grouped in a manner to facilitate their historical investigation and to accentuate their relationship to one another. Certain documents of outstanding eminence, or which embody extraordinary importance of one sort or another, have necessarily been treated separately; but whenever it has seemed desirable or possible, the material has been arranged in groups determined either by the authorship of the papers or the subjects with which they deal.

In order to convey an understanding of this unique and unapproachable collection of material in its entirety, it is necessary to present a list of the individual pieces contained in it. Such a catalogue, therefore, together with transcripts of the printed title-pages of the volumes, is herewith appended:

New Helvetia, April 25, 1847

110. Manuscript written by John Sinclair, organizer of the First Relief, containing the names of the men who first volunteered in the attempt to rescue the Donner Party. It gives the number of days devoted by each to the work, and Curtis's name, originally written in the list, has been stricken out. The final line of this paper relates to one of the most dramatic events in the history of the West. The line reads: "One coverlid left with Mr. Denton, valued at $20.00." John Denton was one of the emigrants whom the first relief sought to save, but his strength gave out during the struggle through the mountains, and, lying down in the snow, he ordered the others to go on. The "one coverlid, valued at $20.00" was laid over him, and he was left to die. When his frozen body was discovered by a later relief party, still wrapped in the coverlid, there was also found in his hand a piece of paper on which he had written, one of the beautiful poems of the language. It was the one beginning:

"Oh! after many roving years
How sweet it is to come
Back to the dwelling place of youth,
Our first and dearest home."

Probably the coverlid valued at $20.00 was used as Denton's shroud, but there is nothing to indicate whether it was ever paid for.

Curtis's account is here given at length and uncancelled. [Fort Sacramento, April .... 1847]

Semple was the Secretary of the Bear Flag Revolutionists. Yerba Buena, January 7, 1847

124. Letter of Micajah McGehee to his father, written on the day the expedition made its start from Taos, leaving behind those who, due to the disaster in the mountains, were unable or unwilling to continue the journey. Written for the purpose of introducing Dr. Benjamin Kern and his brothers, Edward and Richard, to the elder McGehee, and appealing to his father to give to them the hospitalities of his home and any help they might need, on the ground that they had been the writer's fellow sufferers amid the hardships of the broken expedition. Dr. Benjamin Kern never used this letter. He was killed soon afterward in the mountains, whither he had again gone, in company with "Old Bill" Williams, to search for the property and papers that they had been compelled to abandon during the effort to save their own lives. Micajah McGehee, who wrote this letter, kept a diary and notes of the expedition, and his brother, C. J. McGehee, published the narrative thus made in *The Century Magazine* for March, 1891.

125. Manuscript record made by Henry Casey, Assistant Quartermaster of the United States Army at Taos, giving a list of the Government supplies bought by Fremont from the Quartermaster for the purpose of rationing the remnant of his expedition to California after the survivors of the disaster in the mountains had been brought in.

126. Manuscript in the hand of Lieutenant Edward M. Kern, and by him endorsed: "Extracts from the journal of Lt. J. H. Simpson, Corps. Topogl. Engrs. U.S.A., in Relation to Fremont's Expedition, 1848-49." The extracts are two in number, and both reveal the unfavorable opinion of Fremont held by these men most intimately familiar with the expedition, together with certain incidents and events on which their judgments were based. Those portions of Simpson's journal here quoted by Kern were omitted from Simpson's official report as printed by the Government in 1850, and contained in Senate Document No. 64, 31st Congress, 1st Session. The first of the extracts is under date of July 23, 1849. In it Simpson narrates the investigations made by him into the causes resulting in Fremont's disaster and recounts statements made to him by Hatcher and Biggs, to the effect that Fremont was warned in advance by "Old Bill" Williams and others that the route he proposed to take was an impossible one, but that he ignored the advice of the guides and the disaster followed. The second extract deals with Fremont's attitude after the arrival of the Expedition remnant at Taos. In it Simpson gives a statement made to him by Commissary agent Casey (author of the preceding manuscript) to the effect that Fremont tried to leave Taos without paying for the government supplies furnished to him by Casey, and that the bill had to be collected by a Sergeant. Simpson also says the Kerns were given but a small part of the supplies obtained at Taos, and that Fremont's attitude altered greatly upon receipt of the news that General Taylor had been elected to the Presidency. [Santa Fe] July 23 and October 27, 1849

127. Letter to Richard H. Kern at Taos from Captain John Chapman, Commanding at Albique. Telling of the efforts made by him, after the killing of Benjamin Kern and "Old Bill" Williams, to recover the property in the search of which those two men lost their lives. 128. Letter to Richard H. Kern at Taos from Lieutenant Hendrixson, commanding at Albique. Saying the Mexicans under arrest as the supposed murderers of Dr. Benjamin Kern and Williams declare that the Indians are in possession of the material abandoned during the disaster to the Expedition, and that every effort to recover it shall be made. Albique, n.d. [1849]

129. A letter to Edward M. Kern, from Santa Fe, jointly written by Horace Dickinson and John Greiner. Dickinson gives news of the region since Kern's departure, and of continued efforts to recover the material abandoned in the mountains by the Kerns. Major Greiner, in his part of the letter, says he intends to accompany the troops to the Sangre de Christo mountains in the Spring to search for the bodies of Benjamin Kern and Williams and bury them if found, and to make diligent search for everything lost in the mountains. He also transmits messages from Le Blonde the guide and George Estis the mountaineer in which they promise to do all they can in the same endeavor.
Santa Fe, January 27, 1851

130. Letter of Leroux to Richard Kern in which he recites his familiarity during twenty years with the region in which Fremont met catastrophe; locates and describes the passes discovered by and named after Robidoux and himself; testifies to "Old Bill" Williams' perfect knowledge of the country under discussion; and derides Fremont for his attempt to use an impossible route which no sensible mountaineer would for a moment have considered.

144. Original draft of a letter in the hand of Edward M. Kern, probably intended for Lieutenant Simpson. It tells of his homeward journey

after the last of his work in the far West; describes a new route between Santa Fe and Leavenworth which he discovered in company with Captain Pope; says the new route is preferable to the Old Cimmaron trail; and that he traversed it in about forty-two days.

The Effort made by Lieutenant Kern in 1851 to Obtain a Grant of Public Land in Return for His Services in California, and the Hostility of Regular Army Officers toward Fremont's Work in the West.

148. Letter from R. Burgess to Edward Kern revealing that Kern had under consideration a purpose to apply for a grant of public land or money. The letter indicates that Kern took the position that Governmental recompense was "due" to him, as through he had not been paid. It asks that the necessary documents to substantiate Kern's claim be placed in the writer's hands. Washington, October 8, 1851

149. Draft of a letter from Kern to R. Burgess regarding his claim for remuneration and referring to his commission as a Lieutenant in the California Volunteers. He says he is unable to furnish certain historical dates, "having lost them in the mountains with Fremont."
Philadelphia, October 11, 1851

150. Letter from Burgess to Kern regarding papers to be prepared in connection with Kern's claim; stating there had existed, and still persisted in the Capital, much difficulty in regard to everything relating to Fremont's doings in California, due to the attitude taken toward Fremont by officers of the regular army.
Washington, November 4, 1851

VOLUME XXXVI

Letters from Antonine Robidoux, the Trapper and Guide, Written in His Age and Affliction and Asking Lieutenant Kern's Aid in Behalf of His Bill before Congress for Unpaid Services in California.

151. Letter to Edward M. Kern from Robidoux, written in his behalf while he was temporarily blind, in which the frontiersman and guide, ill and grown old, asks Kern to help him in laying before Congress a bill which would recompense him for past services in behalf of the Government. St. Joseph, Missouri, June 22, 1857

152. Letter to Kern in the hand of Robidoux and signed by him, saying he is very ill and again speaking of the help he needs in preparing the documents designed for submittal to Congress in the furtherance of his claim. Robidoux calls Kern his "dear friend."

VOLUME XXXVII

Richard Kern's Manuscript Report of 1853 on the Overland Transcontinental Routes Explored by him and the Best Route for a Railroad to The Pacific Coast as Submitted to Senator Gwin of California.

153. Letter written by Major Backus to Richard Kern regarding new explorations west of Fort Defiance, a part of which information was used by Kern in his report to Senator Gwin.

154. Kern's calculations regarding distances and topographical elevations affecting the building of a transcontinental railroad along the route recommended by him.

155–156–157. Three large manuscript maps of the regions under discussion, all drawn by Richard Kern from the originals made by his brother Edward.

158. Elaborate manuscript, on twenty-nine quarto sheets, all bound together in the form of a book by means of a ribbon. Entirely in the hand of Richard H. Kern, signed by him, and containing on the final page an incription by Kern which reads: "Letter in Reply to one from the Hon. W. M. Gwin, U. S. Senate, in Reference to Pacific Railroad. Jan. 10, 1853." The manuscript is a discussion of various routes of overland travel personally known and traversed by Kern, with especial reference to the relative practicability of those routes for a transcontinental railroad. He considers distances, the nature of the country, natural obstacles which a railroad would find it necessary to overcome, the presence or absence of timber, water, and forage, and enters particularly into a consideration of the various passes through the mountains. As a result of his own explorations, he is of opinion that the best route of the sort desired is one from the Missouri frontier to the Valley of the Rio Grande, and thence to the Valley of the San Joaquin in California, by way of Walker's Pass.

VOLUME XXXVIII

Jacob Snyder's Letter Relating his Experiences of 1845 with Wagons on the Route to the West and Urging Kern to Write a History of the Times and Events in which Kern Participated at Old Fort Sutter in 1846.

159. Long and intimate historical message from Jacob Snyder to Edward Kern. In it he enters into a discussion of the earliest overland migrations to California; says that he and his comrades of 1845 brought wagons over an untravelled trail and through the Johnston Pass to Bear River and the Sacramento Valley in that year, and were probably the first train which came directly through; gives news that Fremont is preparing a book; belittles Fremont's work; and rejoices that Kern is at last coming to a realization of the part he himself played in the Conquest. Snyder also expresses his pleasure that Kern possesses so much material of historical value; voices a strange reference to claims which others make on Kern's records; proposes that Kern write several volumes on the period in which he figured; and urges that Kern buy a tract of land in California and live there henceforth.
San Francisco, November 3, 1860

160. Military pass granted to Edward Kern as a topographical engineer in the Northern army during the Civil War and giving his physical description. St. Louis, January 4, 1862

161. Another military pass of the same character,and giving his age as 41 years. St. Louis, January 5, 1862

OF EXCESSIVE RARITY. Even so eminent a bibliographer as Mr. H. R. Wagner doubted the existence of the map which accompanies the work. (See Wagner, No. 246.) The memoir is the first published account of the proposed Territory. "The Massacre of Henry A. Crabb and his party by the Mexicans, created a desire for Revenge throughout all California. Companies have been formed and large parties are settling in Arizona, near the Mexican Line, with the ulterior object of overrunning Sonora and revenging the Tragedy in which was shed some of the best blood of the State," etc. Contains account of the country, mines, troubles with the Mexicans and Indians, need of law and order, etc.

Pottstown: Printed by the Author, 1889

Of Western Narratives in the Original Edition, this is one of the most difficult to secure. It was set up and printed by the author himself, on a little rotary hand-press which he had erected in the back of the Hartranft mansion at Pottstown; upon it he was able to print a few copies, which were exhausted in the immediate neighborhood almost at once. A 2nd Ed. was made some 7 years later at Washburn, Dakota, a 3rd at Bismarck the following year, and so on. In the reprints many of the original sketches were omitted. "The material for this work was gleaned

from observations made during an Overland Trip across the Plains in 1864-5; a term of Soldiering on the Border; a Journey to Ft. Randall, and up the Dakota River; a Residence in Wyoming and Montana, and a continuous life in the Dakotas and Northwest till 1889."—Preface.
